Dept. of Computer Science

Research Overview

I build efficient and scalable systems for generative AI and LLMs:

- **Inference based**: caching, sparsity, quantization and distributed parallelism for LLMs, diffusion models, world models and agentic systems.
- **Training based**: communication compression and quantization, communication and computation overlapping for LLMs.
- **Serving based**: elastic auto parallelism and efficient scheduling design for LLMs and diffusion models.

Education

Ph.D.	Rice University
CS	Advisor: Prof. Yuke Wang
2025–Present	Department of Computer Science
M.S.	Indiana University Bloomington
2023–2025	Advisor: Prof. Dingwen Tao
B.S.	University of Science and Technology of China
2019–2023	Advisor: Prof. Changling Zou

Employment

Applied Scientist Intern	Amazon Annapurna Labs
Fall 2026 (Part-time)	Working on World Model Inference
Applied Scientist Intern	Amazon Annapurna Labs
Summer 2026	Working on LLM Serverless Serving
Research Assistant	Rice University Yuke Lab
2025–Present	Working on Efficient ML Systems
Research Assistant	Indiana University HiPDAC Lab
2023–2025	Working on High-performance Compression
